

Employee Onboarding

Provide the smoothest onboarding process in your industry.

Organizations with a strong onboarding process improve new hire retention by 82% and productivity by over 70%.

A strong onboarding solution connects new hires with what they need to succeed before day one, engaging them immediately and creating a positive experience.

The screenshot displays the ProLiant HR system interface. At the top, there's a navigation bar with icons for Home, Employee, Payroll, Reports/Analytics, HR, Benefits, Talent Acquisition, and Talent Mgmt. Below this, a search bar allows filtering by Flow, Stage, Employee Name, and E-Verify Case Number. A table lists employee onboarding records with columns for First Name, Last Name, Start Date, Offer Accepted, Stage, and Verified. Below the table, there are sections for 'New Hire Set-up Information', 'Job/Salary Info', 'Assignment', and 'Payroll Import'. The 'New Hire Set-up Information' section includes fields for Name (First, Middle, Last, Suffix), Start Date, Due Date, and Hire Information (At home or On-site).
