

ProLiant®

Time & Labor Management

Spend less time managing your employee's time.

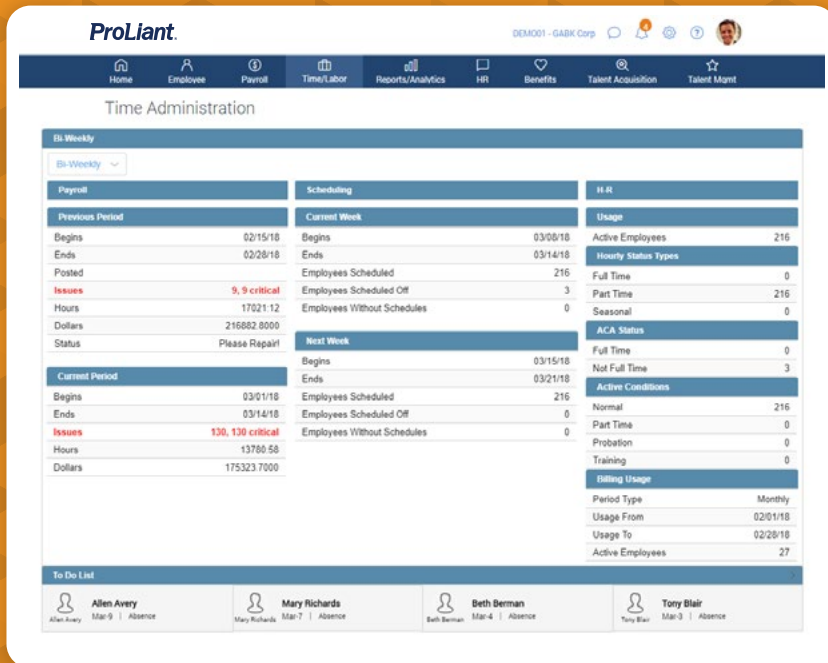

Inaccurate clock-in data can cost businesses up to 7% of their overall payroll costs. Not to mention the additional work needed to amend these inaccuracies.

A time and labor management (TLM) system eliminates opportunities for human error and saves money by performing all the necessary calculations automatically.

- ProLiant's TLM system makes it easy to manage schedules and monitor your employees' hours. Its seamless integration with payroll also means you'll save time and money while increasing accuracy and timeliness.

How can ProLiant save you time and money?

Enhanced Monitoring

Monitor hours worked and overtime thresholds and analyze paid-time-off trends. Get a real-time snapshot of pay period hours, timecard summaries, and missed punches.

Seamless Integration

Integrate time and labor with your payroll processing, increasing accuracy and timeliness.

Automated Scheduling

Set up by single employee or groups by day, week, month, or custom time periods. Assign hours by department and identify schedule patterns.

Simplified Time Clocks

Employees can punch in using a PIN, fingerprint, ID card, and more.
